MARINA MEDICAL BILLING SERVICE ADDS TO EMERGENCY PHYSICIAN SERVICE OFFERING

Marina Medical Billing Service, Inc. today announced a partnership with Emergency Medical Scribe Systems (EMSS) to offer combined Emergency Department Scribe and Emergency Physician Revenue Cycle Management services to emergency physicians.

This partnership brings the combined knowledge and experience of two market leaders to the benefit of emergency physicians seeking to add scribe and revenue cycle management services to their current operating strategy.

Dr. David Strumpf, CEO of EMSS commented “ Scribe services have consistently provided ER practices with significant gains in patient throughput and accurate charge capture, while revenue cycle management services have long provided physician practices with a strong return on investment tied to increased coding accuracy, payment velocity, and improved documentation. Combined, these services allow ER physicians to focus on providing quality care while leaving the administrative elements of medicine to the experts. As CEO of EMSS, and a long-time client of Marina’s, I can personally attest to the benefits of both service offerings.”

One key element of the newly announced partnership is the availability of scribe program start-up funding for those practices that newly contract with both EMSS and Marina for the services provided by each firm.

Lou Silverman, CEO of Marina Medical added “Marina is constantly striving to bring high quality service enhancements to our present and future clients. We believe that our partnership with EMSS is a compelling addition to the Marina tradition.”

About EMSS: EMSS is a full service nationwide scribe company designed to produce real-time documentation of the highest quality. The program has improved Emergency Physician productivity as well as charge capture. EMSS will work with any EMR or paper template system and will recruit, hire, train and maintain the scribe program in its entirety. EMSS provides all employment services including workers compensation and liability insurance with a simple and predictable fee schedule.
